

Write an **Array** Problem.

(rows x columns)

Write an **Area** Problem.

(length x width = distance squared)

Write a **Combination** Problem.

(# of options x # of options = total combinations)

Write a **Comparison** Problem.

(how many times more or less is one than another, comparing two things)

Write an **Equal Groups** Problem.

(each and every are key words, how many in a group x how many groups)
